

Field Innovation through Automation and Digitalization of maintenance work

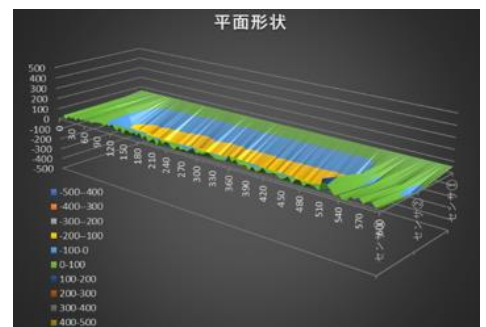

↓ To customers who have such worries ↓

① Automatic Measurement / Inspection

Want to make it easier to inspect the track!

- Measurement by human power is concerned about measurement errors.

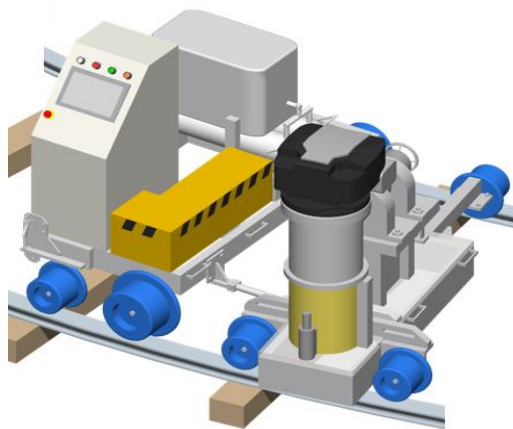

image

- Measurement with sensors
- Acquisition of accurate measurement data
- Visualization of measurement results by monitoring

② Automatic Work

Want to reduce the agonizing work!

- Can't make skilled technicians work forever
- People don't gather for tough work

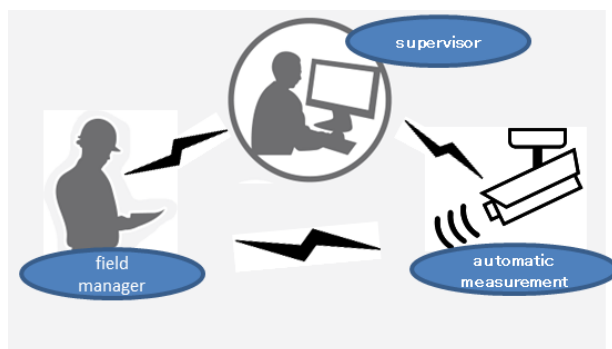

image

- Work is carried out with minimal human hands
- Streamlining maintenance work
- Increased safety by automating maintenance tasks
- Stabilization of work quality through mechanization

③ Remote/Digital

Easier data management!

- Can multiple sites be managed efficiently?

image

- Accumulation and management of work data
- Management of multiple sites by supervisor
- Remote monitoring of machine health
- Work visualization, analysis and preventive maintenance

**These innovations will have all the benefits of cost, people and quality.
Please feel free to consult with us about your concerns.**
