

Information

Regular Replacement of Automatic Release Hook for Rescue boat / Liferaft Combined Davit

AUTOMATIC RELEASE HOOK (Model: Y414310-00100 or CAR-35) is recommended to renew within 5 years.

This release hook comes under the regular maintenance item of release gear / release hook mentioned in MSC.216(82) SOLAS CHAPTER III Regulation 20.11. Recently, because of the influence from the Guidelines for evaluation and replacement of lifeboat release and retrieval system for lifeboat, strong requirement of overhauling the release hook at 5 year dock comes up. However, under the present situation, service providers which can offer the overhaul of this hook is limited. Therefore, we ask to replace the used hook to new hook every 5 year.
